PROFESSIONAL SUMMARY

REMOTE READY

High-impact Computer Science student and Full-Stack Developer specializing in high-performance cross-platform applications. Proven expertise in building production-ready mobile frontends with **Flutter & Dart** paired with robust backends built on **FastAPI & PostgreSQL**. Passionate about architecture, smooth UI animations, and scalable REST API development.

TECHNICAL CORE

Mobile & Frontend

Flutter | Dart | HTML/CSS | JavaScript | REST APIs

Backend & Database

FastAPI | Python | PostgreSQL | Supabase | SQL

Tools, Workflow & Concepts

Git & GitHub | VS Code | Postman | Linux | State Management | Clean Architecture

FEATURED ENGINEERING PROJECTS

FitNovaX — Fitness & Health Platform

Flutter • Dart • FastAPI • PostgreSQL

- Architected and built a modern, full-stack fitness tracking cross-platform application.
- Engineered secure RESTful API endpoints using FastAPI for user authentication, workout telemetry, and database queries.
- Implemented clean state management and responsive custom UI widgets, maintaining 60 FPS performance on mobile.
- Configured relational database schemas on PostgreSQL/Supabase for fast workout history lookups.

ASHWA AI — AI Horse Riding Trainer

Flutter • Python • Computer Vision • AI

- Developed an intelligent movement analysis application designed to assist equestrians with posture and stride tracking.
- Designed end-to-end user workflows connecting real-time telemetry models with a clean user-facing dashboard.
- Optimized app layout and API request handling to minimize latency during live session tracking.

EDUCATION

College of Engineering Attingal
Bachelor of Technology (B.Tech) in Computer Science & Engineering | Reg ID: CEA23CS119

Final Year (Sem 7)
